

<https://github.com/ompl/ompl>

代码

<https://github.com/ompl/ompl>

环境

win11 wsl ubuntu20

参考教程

https://blog.csdn.net/qq_38606680/article/details/129028660

报错参考修改

<https://github.com/ompl/ompl/pull/980/files>

步骤

```
1  # root
2  sudo su -
3
4  # 安装依赖
5  apt-get update && apt-get install -y build-essential castxml cmake libboost-
  filesystem-dev libboost-numpy-dev libboost-program-options-dev libboost-
  python-dev libboost-serialization-dev libboost-system-dev libboost-test-dev
  libeigen3-dev libexpat1 libflann-dev libode-dev libtriangle-dev ninja-build
  pkg-config python3-dev python3-numpy python3-pip pypy3 wget
6
7  # 安装包
8  pip config set global.index-url https://mirrors.cloud.tencent.com/pypi/simple
9  pip install pygccxml==2.2.1 pyplusplus
10
11 # 代码
12 git clone https://github.com/ompl/ompl.git
13 cd ompl
```

```
14 git checkout tags/1.6.0
15
16 # 194行 修改代码 https://github.com/ompl/ompl/pull/980/files
17 vi py-bindings/generate_bindings.py
18
19         try:
20             self.ompl_ns.class_(f'SpecificParam< std::string
21 >').rename('SpecificParamString')
22         except:
23             self.ompl_ns.class_(f'SpecificParam< std::basic_string< char >
24 >').rename('SpecificParamString')
25
26 FileNotFoundErro: [Errno 2] No such file or directory: 'bindings/base'
27 mkdir -p build/Release/py-bindings/bindings/{base,geometric,util}
28
29 # 编译
30 mkdir build && cd build
31 cmake -DCMAKE_BUILD_TYPE=Release -DOMPL_BUILD_PYBINDINGS=ON -
32 DPYTHON_EXECUTABLE=$(which python3) ..
33
34 # 编辑脚本
35 mv build/install-ompl-ubuntu.sh .
36 chmod +x install-ompl-ubuntu.sh
37
38 # 修改脚本 把wget逻辑改成本地方式
39 vi install-ompl-ubuntu.sh
40
41 # 重新构建
42 rm -rf build/
43 ./install-ompl-ubuntu.sh --python
44
45 # 验证 查看是否有_bash.so
46 cd /usr/lib/python3/dist-packages/ompl/base
47
48 # 运行示例
49 python demos/RigidBodyPlanning.py
```
